DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 16-30 and 36-53 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In the drawings, only figs 2A and 2B disclose a shielding plane 42; however, as described by the applicant, Figs 2A and 2B are related to a general type of the device under test (DUT18). There is no specific mentioned that the DUP 18 is a semiconductor wafer comprising a plurality of dies and a conductive shielding plan disposed between one of the conductive structure and the functional circuitry of the at least one the dies as required by the independent claims 16 and 27. Figs. 7, 15 and 21 show a semiconductor wafer 124 with a plurality of dies formed on the wafer but there is no described that a conductive shielding plan is disposed between one of the conductive structure and the functional circuitry of the at least one the dies as recited in the claims 16 and 27. Therefore, claims 16 and 27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. Claims 17-26, 28-30 and 36-53 are dependent on the claims 16 and 27 respectively and are rejected accordingly.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the recited feature that an electrically conductive shielding plane disposed between ones of the conductive structures and the functional circuitry of the at least one of the dies must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. There is free of art rejection for claims 16-30 and 36-53.

Response to Arguments

4. Applicant's arguments with respect to claims 16-30, 39, 44 and 46-49 have been considered but are moot in view of the new ground(s) of rejection.
